Our immersive experiences from our collection bring an exciting flair to any event. They're not only fun but also designed to be highly shareable and social media savvy, taking inspiration from celebrity culture.

With our **Video FX Booths**, you can create stunning 10 to 30-second videos featuring intros and outros, catchy audio, jump cuts, glitch effects, slow motion, and more. Guests can fully customise their video experience with just a touch, and the best part? It can be instantly shared via email or WhatsApp, allowing for immediate social media posting right after participation.

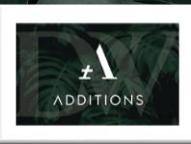

For an even more elevated experience, you can add an enclosure that enhances the upscale feel and boosts video quality. Our professional enclosures are equipped with industry-standard lighting and reflective materials to ensure top-notch results.

We also have the **360 Aerial Video Booth** which is ideal for venues with naturally beautiful surroundings, we recommend the floor video booths with enclosures for other venues. Our team can advise on which one is more suitable to your requirements.

Frequently asked Questions

How large are the digital engagement installations ?

360 FX Video Booth base 1.2 mtrs x the arm is adjustable between 130cm-190cm
360 Enclosures for FX Video Booth around 4-4.5mtrs depending on the enclosure
360 Aerial Booth 10ft x 8ft x 3ft
The Worlds Largest Selfie Cam H192cm x W68cm

How much space is required at my venue?

We ask that we have at least a 4m x 4m space to work in this allows enough room for group photos in front of the mirror as well as accommodating the props, if you choose this package. We do liaise with your venue beforehand to discuss these matters to suit everybody. If you have opted to have a backdrop this will require extra space, though some of our backdrops are adjustable – please our inflatable backdrops require none stop electric source.

How long is set up time?

We arrive half an hour to an hour before the start time required (dependent on the venue and the item you hired) to ensure everything is working correctly. This also allows us time to heat up the printer and check that too, if you opt for the Selfie Cam. This is done in a discreet way as not to take attention of your guests away from the day.

What if it doesn't work?

We have experienced staff to deal with all problems, software issues are resolved by a virtual team while hardware like the HTML Cable or the printer can all be replaced with spares within the hour.
